

# levy fact

Over the last nine years, we've reduced \$17.2 million. These reductions have impacted programs, services, and staffing throughout our district. Results of these cuts have created significant gaps in how we educate our students. Long-term, we cannot sustain these significant instructional losses as they have an impact on our student success. Class sizes and classroom supports will be further impacted. We are at a breaking point. We have done everything to be fiscally prudent and maintain as much of the services and programs as we possibly can. We can no longer maintain this course. We need funding now.
